#### **ACKNOWLEDGEMENT**

The Academy of Ethiopian Languages expresses its profound gratitude to the United Nations Financial System for Science and Technology for Development (UNFSSTD) for sponsoring this project until the completion of the translation of terms. Our thanks also goes to the Ethiopian Science and Technology Commission, Addis Ababa University, and to all scholars who have actively participated in the project.

# **FOREWORD**

The knowledge and practice of science and technology has become the driving force in the development of the world. It has now become essential that information of science and technology be communicated to the people at all levels.

There is a growing awareness among states and governments that developing media that could make an easy flow of information should be a priority on their agenda. From a pedagogical point-of-view, language is the principal area where one should rest his focus upon. For many decades now social scientists and educationalists have agreed that one's own language is the best and effective medium for acquiring knowledge and conceptualizing ideas.

In this regard, the major responsibility lies on the shoulder of developing nations which, as it stands, have to learn science and technology from the developed ones. Countries which would choose to import science and technology should see to it that their languages be first developed in order to receive new concepts.

Words are the basic units of a language which carry concepts. It then follows that developing a language would mean developing its vocabulary. In this respect, terminology, the field of study dealing with terms, becomes indispensable.

The Department of Terminology and Translation, Academy of Ethiopian Languages, is working towards the promotion of Ethiopian languages and is presently engaged in developing technical terms in Amharic, the working language of Ethiopia.

The translation work was launched in November 1981. Special care was taken in the selection of panelists and the Academy was able to bring together known linguists, subject specialists and professionals mainly from Addis Ababa University. This phase of the project took some six years and came to its conclusion with the International Seminar on Terminology (June 16-18, 1986).

While the translation work was in progress, effort has been made to circulate the translated terms among the intellectual community. A series of booklets, Preliminary Lists I-IV, were sent to individuals, institutions and schools for comments. Feedbacks were used to upgrade the quality of the translation. In the following three years the project continued with the remaining tasks such as the preparation of sample reading materials and concept illustrations.

Thanks to the donor organization and other involved institutions, the Academy was able to publish the translated terms in the thirteen subject fields and sample reading materials into thirteen and three booklets respectively. These booklets have already been disseminated to a wider audience and won good reception.

Encouraged by what has so for been achieved the Academy decided to compile the thirteen booklets into a single dictionary. The publication of this English-Amharic Science and Technology Dictionary is the result of this commitment. It is hoped to be an important step towards developing the size of Amharic vocabulary and its capacity in communicating scientific and technological knowledge. It goes without saying, however, that this is only a beginning which need to be continually edited and updated.

Cognizant of the limited resources available to Amharic, in particular in the realm of scientific vocabularies and expression, a Science and Technology Terms Translation Project (STTTP) has been launched in 1981 in direct collaboration with the Addis Ababa University and the Ethiopian Science and Technology Commission which acted as the executing agency of the project. Thus, 15,087 English terms in the fields of science and technology are given Amharic equivalents.

The project was originally aimed at developing technical terms for junior and secondary levels of education in order to help the preparation of textbooks in Amharic. It was believed that students, themselves being the primary beneficiaries, could play an important role in communicating scientific and technical concepts into the public.

Hence, educational textbooks of these levels have been used as the primary source for selecting the terms. And in some cases working places like garages, industries, construction sites, etc. have been consulted. High school teachers and college students have participated in the compilation which lasted from July 7- October 7, 1981.

The project was organized in thirteen panels that commensurate thirteen disciplines in the area. These are:

1) Agriculture	8) Mathematic
2) Botany	9) Medicine
3) Building Construction	10) Nutrition
4) Chemistry	11) Physics
5) Electro-Mechanics	12) Statistics
6) Geography	13) Zoology
7) Geology

### NOTE

The dictionary is prepared in English entry considering that this would be more convinient to introduce the new coined Amharic terms.

There are 15,087 entries included in this dictionary. The English terms and their Amharic equivalents are given as they are treated in their respective panels. Hence, at times, similar English terms from different panels may or may not have similar Amharic equivalents. The different Amharic equivalents of the same English term could have come under a single entry. For various reasons, however, it is agreed to present every Amharic term under a separate entry.

Therefore, users are advised to refer to the Amharic term in the discipline of their particular choice. The discipline in which a term is found is indicated by the abbreviation given following every entry.

For example:

length, Em(in electro-mechanics)

length, Ma (in mathematics)

length, Py (in physics)

Solution, Ma (in mathematics)

Solution, Ch (in Chemistry)

## Abbreviations of field of studies:

Ag-Agriculture

Ma-Mathematics

Bt-Botany

Me-Medicine

**Bc-Building Construction** 

Nu-Nutrition

Ch-Chemistry

Py-Physics

Em-Electro-Mechanics

St- Statistics

Gg-Geography

Zo-Zoology

Gl-Geology

# **ਸਮਾਜੋ**ਤ የਸਮਨ ਨਾਪਰੇ ਸਟਸਟ Panels and Panelists

The actual translation work was carried out by 13 panels each of which consist a linguist and two subject specialists. The activities of all panels were coordinated by a chief language expert and two scientists.

The panel formation has been as follows;

- 1. Botany: Ato Fikredingel Beyene, Linguist, Chairman
  Dr. Amha Belay, Biologist, Member
  Ato Zemede Asfaw, Biologist, Member
- 2. Zoology: Ato Tesfaye Shewaye, Linguist, Chairman

  Dr. Tewolde berhan G.Egziabher, Biologist, Member

  (until the end of phase II of the project)

Ato Kifle Dagne, Biologist, Member

Ato Afework Bekele, Biologist, Member (replaced Dr. Tewolde in phase III of the project)

3. Chemistry: Ato Yilma Kebede, Linguist, Chairman

Professor Tewodros Solomon, Chemist, Member Dr. Berhanu Abegaz, Chemist, Member Dr. Fikru Tafesse, Chemist, Member (Phase I and part of Phase II) 4. Geology:Dr. Melaku Asfaw, Linguist, Chairman

Dr. Getaneh Assefa, Geologist, Member (until the end of phase II of the project)

Ato Gezahegn Yirgu, Geologist, Member

(until the end of phase II of the project)

Ato Tilahun Mammo, Geologist, Member (until the end of phase II of the project)

Dr. Bekele Megersa, Geologist, Member (replaced Dr. Getaneh in phase III)

5. Mathematics: Ato Assefa Gebremariam Tessema, Linguist,

Professor Alemayehu Haile, Mathematician, Member Professor Bisrat Dilnessahu, Mathematician, Member

6. Physics:Dr. Tadesse Beyene, Linguist, Chairman

Dr. Laikemariam Asfaw, Physicist, Member

Ato Bantikassegn Workalemahu, Physicist, Member (joined the pane! in phase III of the project)

7. Statistics:Dr. Hailu Araya, Linguist, Chairman (until the end of phase II of the project)

Ato Lulseged Erkähun, Linguist, chairman (replaced Dr. Hailu in phase III of the project)

Professor Ayenew Ejigou. Statistician, Member (until the end of phase II of the project)

Dr. Alemayehu Melaku, Statistician, Member (replaced

Dr. Ayenew in phase III of the project)

Professor Asmerom Kidane, Statistician, Member (joined the panel in Phase III of the project) 8. Geography:Late Ato Degnachew Worku, Linguist, Chairman (until the end of Phase II of the project)

Ato Fisseha Sisay, Linguist, Chairman (replaced Ato Dagnachew in Phase III of the project)

Ato Daniel Gemetchu, Geographer, Member

Dr. Bekure W/Semait, Geographer, Member (until the end of phase II of the project)

Dr. Mekete Belachew, Geographer, Member (replaced Dr. Bekure in phase III of the project)

9. Electro-Mechanical:Ato Debebe Seifu, Linguist, Chairman for Electrical Subpanel until end of phase II

> Ato Takele Tadesse, Linguist, Chairman, for Mechanical subpanel until end of phase II and Chairman of the whole panel in phase III

Ato Getachew Bizuneh, Mechanical Engineer, Member Dr. Hailu Ayele, Electrical Engineer, Member

 Building-Construction: Ato Seifu Metaferia, Linguist, Chairman

Dr. Zewdie Berhane, Civil Engineer, Member

Dr. Tariku Belay, Architect, Member

 Medicine: Late Dr. Tito Lepisa, Linguist, Chairman (until about end of phase II)

Ato Fikredingel Beyene, Linguist, Chairman (in phase III of the project)

Dr. Solomon Haregewoin, Medical Doctor, Member Dr. Seifu Daniel, Medical Doctor, Member 12. Nutrition: Ato Fisseha Sissay, Linguist, Chairman
Ato Girma Seyoum, Member (until end of phase II)
Ato Yacob T/Birhan, Member (until end of phase II)
Ato Kifle Dagne, Bilogist, Member (joined the panel in Phase III)

13. Agriculture:Late Ato Seyoum Sebhat, Linguist, Chairman (until about end of Phase II)

Ato Mekonnen Teferra, Agriculture Expert, Member (Until end of Phase II)

Ato Ayalew Kassaye, Agriculture Expert, Member (until end of Phase II)

Ato Muluneh Mengistu, Linguist, Chairman (In Phase III of the project)

Ato Eshetu Areda, Agriculture Expert, Member (in Phase III of the project)

Ato Goshu Mekonnen, Agriculture Expert, Member (Phase I and part of Phase II)

14. Coordinators:Dr. Amsalu Aklilu, Linguist, Chief Language Expert of the project (until end of Phase II)

Dr. Ermias Dagne, Chemist, Technical Coordinator

Dr. Demissu Gemeda, Mathematician, Technical Coordinator

 Project Directors:Dr. Amsalu Aklilu, Secretary General of the Academy (until end of Phase I)

Ato Assefa Gebremariam, Secretary General of the Academy (replaced Dr. Amsalu starting Phase II)

 Project Assistants: Ato Girma Zenebe (Senior Language expert at the Academy Since 1981)

Ato Meseret Tesfaye (expert at the Academy from 1983 until the end of Phase III)

Ato Alemu Haile (expert at the Academy from 1983 until the end of Phase III)

Ato Solomon Ashagre (expert at the Academy; joined in Phase II and stayed until the end of Phase III)

Ato Alemayehu Gurmu (expert at the Academy since 1985)
